

Non-Profit Making Partnership “Equal Right to Life”

Report on social programs realization in 2009

1. Trainings for regional oncologists on the basis of leading oncologic scientific centers
2. The program of prevention and early diagnostics of oncological diseases “Cancer Wanted”
3. Introduction of the register of patients with the diagnosis of breast cancer
4. Cooperation with organizations of oncologic patients (Movement Against Cancer, Power of Life and others)
5. Realization of insurance programs in oncology
6. Cooperation with leading oncological scientific centers (N. N. Blokhin Russian Cancer Research Center of the Russian Academy of Medical Sciences, P. A. Herzen Moscow Scientific Research Oncological Institute, Russian Medical Academy of Post-Graduate Education and others)
7. Modernization of the material and technical base of oncological medical treatment facilities
8. Consultations for oncologic patients (Federal Hot Line 8-800-200-2-200, extramural consultations of leading specialists)

In 2009 development of Non-Profit Making Partnership “Equal Right to Life” activities was progressive and dynamic. Signed a year earlier agreement on information exchange and introduction of the register of oncologic patients allowed to implement a complex of starting events for creation and introduction of the federal register of patients with the diagnosis of breast cancer. Educational events on the basis of leading oncological center of the country (Russian Medical Academy of Post-Graduate Education, N. N. Blokhin Russia Cancer Research Center of the Russian Academy of Medical Sciences) continued, that for the period from 2006 have been attended by more than 400 oncologists from all regions of the Russian Federation for lectures and workshops, as well as attended trainings at their working places.

The year 2009 was marked by the start of the project of prevention and early diagnostics of oncological diseases “Cancer Wanted”, during which on the basis of medical treatment facilities of Moscow region, Ekaterinburg and Kazan “Days of Early Diagnostics” were arranged, during which more than 50 patients with malignant tumors were detected. Most cases of oncologic pathologies were detected at early stages, that allowed to administer therapy timely and in the most efficient way. Just as a year ago within the frame of the project some informational and educational actions for young people were arranged in Kaliningrad, Khanty-Mansiysk, Novosibirsk and other cities.

As part of creation of the first insurance program in oncology, that will allow to render substantial support in delivering of a high-tech medical aid and provision of medicines to oncologic patients, an agreement with a number of insurance companies was signed.

Directions for free of charge consultations of patients on all aspects of oncological diseases got further development.

The expenses for realization of social programs amounted to 58.600.000 roubles.

1. Trainings for regional oncologists on the basis of leading oncological scientific centers

Educational events were arranged as in previous years on the basis of N. N. Blokhin Russia Cancer Research Center of the Russian Academy of Medical Sciences and Russian Medical Academy of Post-Graduate Education. Such trainings stipulate both theoretical and practical parts (training at the working place). Specialists from 42 regions of the Russian Federation – altogether 100 persons took part in the events. The theoretical part, conducted by leading specialists of Russian Medical Academy of Post-Graduate Education included lectures and workshops with presentation of the main aspects of diagnostics and treatment of malignant tumors of most localizations and directions: malignant skin lesions, possibilities of drug therapy of cervical cancer, GIST tumors, possibilities of drug therapy of hysterocarcinoma, malignant lymphoma, non-Hodgkin`s lymphomas of gastrointestinal tract, predictors and principles of endocrine therapy of breast cancer, lymphadenopathy, principles of treatment of central breast cancer, drug therapy of epidermoid carcinoma of head and neck, drug therapy of widespread prostate cancer, treatment of breast cancer, febrile neutropenia (prevention, treatment) and others. In June 2009 a master class for nurses on the use of a high-tech infusion equipment was arranged (on the basis of Russian Medical Academy of Post-Graduate Education).

Participants of trainings on the basis of N. N. Blokhin Russia Cancer
Research Center of the Russian Academy of Medical Sciences

2. The Program of prevention and early diagnostics of oncological diseases “Cancer Wanted”

Non-Profit Making Partnership “Equal Right to Life” faces one of the main and difficult tasks – cooperation in conduction of preventive events on screening and early diagnostics of oncologic pathologies. In most developed countries of the world such tasks are solved as part of national programs and strategies of fight with cancer. Responsibility for efficient operation of national services for oncology is often taken by leaders of states and heads of governments. Thus, for example, mass screening of cervical cancer, conducted in Iceland and Finland resulted in decrease of death rate from this disease by 80% and 50%. For the purpose of development of similar programs in our country Non-Profit Making Partnership “Equal Right to Life”, Interregional

social movement “Movement Against Cancer” with the participation of leading Russian oncologists in 2008 developed and initiated realization of “Cancer Wanted” program.

The program started in February 2009 in Ekaterinburg, where in the period from 17 till 21 of February about 2000 persons were examined in medical treatment facilities of the city. In Moscow region, where mass mammographic screening as well as other kinds of investigations are conducted as part of the program, “Cancer Wanted” started its work in May 2009. For about 4 months in the territory of 5 districts of Moscow region, including distant ones, about one thousand five hundred citizens were examined: 26 cancer cases were detected, and 136 persons were diagnosed with benign tumors. Most cancer cases were diagnoses at early stages, and now patients get their timely administered treatment. It has become a tradition to conduct the “Week of early diagnostics” in the Republic of Tatarstan” every month with participating of about a thousand people. Conduction of the project in the near future is planned in a number of other constituent territories of the Russian Federation.

In the course of “Knowledge for the sake of health of future generations” project that started earlier, in Kaliningrad, Novosibirsk, Khanty-Mansiysk and other cities a project of prevention of oncological diseases and promotion of healthy life style of “Cancer Wanted School” was arranged. The events were conducted on the basis of higher educational institutions and constantly drew increased attention on the part of young audience. The actions were conducted with the participation of chief pediatric oncologist of the Ministry of Health and Social Development of the Russian Federation professor V. G. Polyakov, TV-host and actress Olga Spirkina and a number of leading specialists.

As part of the project demonstration of popular-science movie “White on black” dedicated to prevention and methods of early diagnostics of cancer and innovative treatment technologies was arranged. Participants of the event got booklets and leaflets with information on risk factors of premalignant and oncological diseases and methods of their elimination. No sooner it started, the conference turned into a public conversation with the audience. According to schoolchildren, they often have questions related to health and prevention of different diseases. As a rule, it is connected with diseases of their family members and relatives. There is no place they can get competent answers to their questions. At the same time an idea to come for consultation to a specialist causes doubt in most of them, and thus such meetings with doctors are very important. Internet site www.onko-dozor.ru is available since 2009.

Event	Location	Date	Conditions
Days of early diagnostics	Moscow regional oncologic dispensary	19.05, 26.05	Mammography, examination by specialists: mammologist, urologist, surgeon, endoscopist, gynaecologist, proctologist
Days of early diagnostics	The city of Pavlov-Posad, polyclinic # 1	29.06-03.07	Mammography
Days of early diagnostics	Polyclinic of Dmitrov Central District Hospital	06.07-10.07	Mammography
Days of early diagnostics	Serebryanye Prudy, Central District Hospital	13.07-17.07	Mammography

Days of early diagnostics	The city of Kazan, City clinical hospital # 7	20.07-23.07, 24.08-27.08, 22.09-25.09, then monthly (4 days per month)	Mammography, examination by gynaecologist
Days of early diagnostics of breast cancer	Moscow regional oncologic dispensary	Monday, Tuesday for the whole October	Mammography
Cancer Wanted School	Tomsk State University	08.09	Informational and educational project for youth
Cancer Wanted School	E. Kant Russian State University	02.12	Informational and educational project for youth
Cancer Wanted School	Novosibirsk State University (assembly hall)	19.12	Informational and educational project for youth
Cancer Wanted School	Yugorsk State University	23.12	Informational and educational project for youth

3. Introduction of the register of patients with the diagnosis of breast cancer

To increase quality of determination of the necessity in adequate antitumoral treatment, detection of patients in need of such treatment Non-Profit Making Partnership “Equal Right to Life” with the support of Interregional social movement “Movement Against Cancer” came forward with an initiative to form a register of patients with malignant breast tumors, that would allow to get information on each patient in need of modern treatment. As part of the project the Federal Service for supervision in the sphere of health and social development (Roszdravnadzor) and Non –Profit Making Partnership “Equal Right to Life” have signed a cooperation agreement, that stipulates realization of a number of events on exchange of information on provision of medicines to citizens with oncological diseases, as well as timely reaction to detected cases of infringement of patients` rights related to rendering of medical aid.

The register (electronic database) in 2009 is created on the basis of Ivanovo regional oncological dispensary, data entry is performed. Similar register in the near future will be created in Astrakhan, Yaroslavl, Nizhny Novgorod and many other cities, forming a federal net.

Safety of the register and its protection from hackers` attacks is ensured by a security software complex, that prevents any external and cases of Access to the database.

4. Cooperation with organizations of oncologic patients

The Non-Profit Making Partnership became one of the initiators of Interregional social movement “Movement Against Cancer”, established in early 2008. Currently the number of cities with branches of the Movement exceeds 15 (including Moscow, St.Petersburg, Kazan, Nizhny Novgorod, Rostov-on-Don, Novosibirsk, Vladivostok, Samara and a number of other big cities).

In 2009 the Movement successfully conducted the second annual Forum, in which leading specialists oncologists, health organizers took part.

One of the most significant directions in the activity is “Patient’s School” organization, in the course of which patients get maximum complete and objective information, medical, legal and psychological support. Such schools for patients were conducted in dozens of cities of Russia with the participation of leading specialists oncologists, psychologists and lawyers.

www.rakpobedim.ru

The momentous event became publication of the “White book” http://www.ravnoepravo.ru/sites/default/files/documents/Belaya_kniga_o_probleme_otkaza_onkologicheskim_bolnym_v_Rossii_v_innovacionnyh_protivoopuholevyh_preparatah.pdf on the issues of access of oncological patients to antitumoral drugs. The book caused great resonance both in the society and among representatives of the government authorities. Inspections were initiated in a number of constituent territories of the Russian Federation by results of consideration of the book materials. There is an active cooperation with Roszdravnadzor, implementing inspection of enforcement of patients` rights by results of their referrals to the Movement against cancer.

**Patient's School, arranged together with
Interregional Social Movement "Movement Against Cancer"**

- Nizhny Novgorod – 2.02, 27.11
- Petrozavodsk – 09.06
- Nizhny Tagil – 28.03, 28.11
- Samara – 03.04
- Ufa – 04.04
- Kazan – 24.04, 04.12
- Tomsk 07.09
- Astrakhan – 16.10
- Gatchina – 01.10
- Kaliningrad – 02.12
- Rostov- on-Don – 19.11
- Chelyabinsk – 27.11
- Novosibirsk – 18.12
- Ulyanovsk – 14.11
- Samara – 15.12

5. Realization of insurance programs in oncology

Non-Profit Making Partnership “Equal Right to Life” and a number of insurance companies (“MSK-Life”, “Allianz Rosno Life” and others) launch the first joint Project in the Russian Federation of personal insurance in case of oncological disease. Such project stipulates a unique partner cooperation of an insurance company and a non-commercial organization, that will allow to solve socially significant issues of early diagnostics and treatment of malignant tumors efficiently. Insurance policies in the frame of this project depending on the selected insurance program will provide the following coverage of an insurance case:

- - Information assistance and consulting on the issues of early diagnostics and prevention of oncological diseases;
- - Organization of consulting assistance at the stages of special diagnostics and determination of diagnosis, involvement of experts of the regional level (main specialists) and specialists of federal expert centers (professors, academicians) in the sphere of diagnostics of malignant tumors, organization of additional diagnostic procedures and investigations according to an expert conclusion;
- Organization of consulting assistance in development of an individual treatment plan, involvement of experts of the regional level (main specialists) and specialists of federal expert centers (professor, academician);

- . - Organization of consulting assistance in conduction of surgical treatment, involvement of experts of the regional level (main specialists) and specialists of federal expert centers (professor, academician);
- . - Organization of consulting assistance during drug therapy and radiological treatment, involvement of experts of the regional level (main specialists) and specialists of federal expert centers (professor, academician);
- . - Rendering of consulting assistance on legal issues;
- . - Representation of interests in executive authorities, exercising control and inspection functions in the sphere of health;
- . - Personal treatment fund, used for the following purposes: payment of drugs, recommended/administered to a patient by his/her attending physician – in case such drugs cannot be timely provided as part of compulsory health insurance system; payment of additional medical services in cases when such services are recommended/administered by a consulting physician and cannot be timely provided as part of compulsory health insurance system;

Non-Profit Making Partnership “Equal Right to Life” acts as coordinator of the project in the quality of external independent auditor, ensuring quality control and coordination of services, rendered by commercial assistance companies.

6. Cooperation with leading oncological scientific centers

Cooperation with leading Russian and foreign oncological centers is the most important components of high efficiency of the events conducted by Non-Profit Making Partnership “Equal Right to Life”.

President of Russian Academy of Medical Sciences, academician of Russian Academy of Sciences, Director of State Institution N. N Blokhin Russian Cancer Research Center M. I. Davydov is a cochairman of the Supervisory Board of All-Russian oncological social program “Equal Right to Life” and renders all-round support in its work. Thus, most trainings for regional specialists are held on the basis of N. N Blokhin Russian Cancer Research Center of the Russian Academy of Medical Sciences, there are always any departments, operating theaters open for practical work of trainee doctors, there is an opportunity to take part in any conciliums, conferences, round tables, arranged on the basis of the Center.

P. A. Herzen Moscow Scientific Research Oncological Institute is also a strategic partner of Non-commercial Partnership “Equal Right to Life”. Leading specialists of the Institute (professor V. I. Chissov, professor V. V. Starinsky, professor G. A. Frank and others) participate in scientific and practice conferences and round tables, organized by Non-commercial Partnership “Equal Right to Life”, that also constantly participates in the events, arranged by professor V. I. Chissov.

Active cooperation in all spheres of oncology is also conducted with the Department of Oncology of Russian Medical Academy of Post-Graduate Education (conduction of trainings, preparation of study guides, organization of scientific and practical conferences and other events).

7. Modernization of the material and technical base of oncological medical treatment facilities

As in the period 2006 – 2008, in the past period an active support to medical treatment facilities of oncological profile in modernization of the material and technical base was rendered.

Thus, in 2009 a high performance endoscopic complex was transferred to Nizhny Novgorod Regional Oncological Dispensary for conduction of early diagnostics of diseases of respiratory system and gastrointestinal tract. In total 11 million roubles was spent for purchase of the equipment for Nizhny Novgorod Regional Oncological Dispensary.

Also in 2009 endoscopic equipment for subsequent donation to P. A. Herzen Moscow Scientific Research Oncological Institute. Equipping of regional oncological facilities with armchair-transformers for long-term chemotherapy as well as infusion controllers for precise dosed administration of antitumoral drugs was organized.

Equipment was supplied to 70 medical treatment facilities. The total cost of the supplied equipment amounted to 18 616 499 roubles.

Date	Medical treatment facility	City	Donated medical equipment	Amount
